Instructions for Visual prompts

This is the Voiceover of one of my video scripts.
First you lock it and never change it until it's complete.
Now give me visual master prompts in sets of 5 scenes.
There are some specifications of visual prompts

- must based on reality to look documentary professional and realistic
- colour grading must be in 8k Resolution
- must contain a consistency in all scenes to create a professional look
- add natural sound effects where it needed
- also focus on the smooth camera movements like professional documentary
- no logo or any text if text is needed it will command you .
- also add the visual hooks where it needed and mention when visual hook is needed
- before the visual master prompts must give the Vo of this scene for reference.
- now give me first 5 scenes
- Avoid the Repetition of Scenes visual prompts .
- If there is any blueprints are required i will give u a command
- Give each scene in code block form to copy in one click
